

CLAIM 44. A hood for a hearing protector produced from plastic injection molding comprising:

a first portion formed from injection molding a first plastic material;  
a second portion formed from injection molding a second plastic material;  
said first and second portions being mutually contiguous to each other to define a single contiguous hood, said first and second portions being separated by a separation line which is visible on said outer surface of said hood, said first portion comprising a central portion and said second portion surrounding said central portion, said first plastic material having different properties in at least one respect from said second plastic material and wherein one of said first or second plastic materials is softer relative to the other of said first or second plastic materials.

CLAIM 45. A hood for a hearing protector comprising:

a first portion formed from a first plastic material;  
a second portion formed from a second plastic material;  
said first and second portions being mutually contiguous to each other to define a single contiguous hood, said first and second portions being separated by a separation line which is visible on said outer surface of said hood, said first portion comprising a central portion and said second portion surrounding said central portion, said first plastic material having different properties in at least one respect from said second plastic material and wherein one of said first or second plastic materials is softer relative to the other of said first or second plastic materials.
